Description

Based on SVN trunk.

When I created a new Wiki and tried to access the new wiki home page I would get the following error

NoMethodError (undefined method `empty?' for nil:NilClass):
/app/controllers/wiki_controller.rb:47:in `edit'
/app/controllers/wiki_controller.rb:27:in `index'

Changing the following line (47 in wiki controller)

@content.text = "h1. #{@page.pretty_title}" if @content.text.empty?
to
@content.text = "h1. #{@page.pretty_title}" if @content.text.nil?

Appears to have fixed it for me, not sure what I have broken yet by doing this ;)

History

#1 - 2007-03-20 11:08 - Thomas Lecavelier

This patch correct the bug on my redmine for me too.

#2 - 2007-03-20 13:42 - Jean-Philippe Lang

Thanks, i've just fixed in trunk.
Used .blank? instead of .nil?

This was a regression due to the "mysql strict mode"
fix.

Sorry...
