Description

Hey,

I am getting the following error page when trying to add the attached response to the linked forum topic:
Redmine is down :(

History

Seems to be related to the web UI trying to use a specific response ID.
Creating a new response with content "test", editing that response to contain the originally intended text worked.

- Category changed from Forums to Website (redmine.org)

- Status changed from New to Closed

I think it is due to high load.

I'm facing the same problem trying to comment my post here: https://www.redmine.org/boards/2/topics/57233?r=57235

Can this be related to the title including a "(" or ")" digit?
Just a coincidence?
