Revision 15287 - 2016-03-26 11:20 - Jean-Philippe Lang

Text in the "removed" part of a diff is double-escaped (#22115).

Patch by Felix Schäfer.

History

#1 - 2016-02-25 21:08 - Felix Schäfer

- File 22115-dont_double_escape_deleted_diff_parts.diff added

The attached diff adds a test and a diff for this behaviour.

The problem is in [source/trunk/lib/redmine/helpers/diff.rb@15153](https://source.trunk/lib/redmine/helpers/diff.rb@15153): the string deleted is concatenated from unsafe strings (lines 46 and 55) and an html escaped string (line 56) and thus html unsafe. It then is added + to an html_safe string in line 65, which causes deleted to be html escaped a second time before being concatenated to the string on the left hand of the +.

The patch moves the explicit html escape to line 65 and keeps the explicit html escape to avoid problems with the implicit html escaping performed by the addition + to a html_safe string.

Ah, and the `.join(' ').html_safe` at the end is replaced with the safer `safe_join` which ensures any non-html_safe string in the array is html escaped before concatenation.

#3 - 2016-02-25 21:32 - Felix Schäfer

- File 22115-dont_double_escape_deleted_diff_parts.diff added

`safe_join` comes from an `ActionView::Helper` that wasn't included yet in `Redmine::Helpers::Diff`, this patch corrects this omission.

#4 - 2016-03-26 04:26 - Toshi MARUYAMA

- Target version set to 3.3.0

#5 - 2016-03-26 11:20 - Jean-Philippe Lang

- Subject changed from Text in the "removed" part of a diff is double-escaped to Text in the "removed" part of a wiki diff is double-escaped

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Resolution set to Fixed

Committed, thanks.
