<b>Description</b> Hello,  My team is using LaTeX for documents, it would be great if we could collaborate to create documents using the wiki and then export to LaTeX for including in other documents.  I found that RedCloth 4 is able to export to LaTeX but at I read in <a href="#">#1754</a> that Redmine could not easily upgrade to RedCloth 4.  So, I'm just reporting that it could bring a feature that could be useful to some of us.  Thanks,  Gael

Since [#1754](#) is fixed, does this mean Latex export could be implemented relatively easily?

**#3 - 2010-09-02 05:21 - Jean-Baptiste Barth**

[#1754](#) only fixes support for Redcloth 3.x branch. Redcloth 4 is not supported yet but I opened an issue for that, see [#6269](#)
