<b>Target version:</b>	3.2.2		
<b>Description</b>			
On small screens: While the directory listing table may be scrolled horizontally, the revision table may not. Therefore the commit message and author is not available on mobile devices.			
before.png The attached patch adds an .autoscroll container around the revision graph and table. Additionally it adds position: relative to the .autoscroll CSS ruleset to ensure, that the revision graph scrolls with the table content.			
after.png The patch was created based on the current trunk <a href="#">r15287</a> .
