Redmine - Feature #22452

Add ability to display last note on issue query

2016-04-11 19:40 - Sebastian Paluch

Resolution:	Duplicate			

Description
It would be very useful to display last issue note in the issue query just like it is possible for description.

History

#1 - 2016-05-11 09:51 - Toshi MARUYAMA

- Category changed from UI to Issues filter

#2 - 2016-07-11 19:47 - @ go2null

We use a "Last note" custom field and a [custom workflow](#).

If required, we could possibly break it out into a plugin.

Our company could also greatly profit from this additional query functionality.

#4 - 2016-07-12 10:00 - Sebastian Paluch

This is how I solved it locally:

added to the issue:

```
def last_note
 if !journals || !(journal = journals.where("notes <> ''").last)
   @last_note ||= ""
 else
   @last_note ||= journal.notes
 end
```

added to issue_query:

```
        available_columns << QueryColumn.new(:last_note,
          :caption => :field_notes_last,
          :totalable => false,
          :inline => false
        ) unless columns.detect{ |c| c.name == :last_note }
```

but this does not check for security, private notes, etc.
sorry for not providing as a patch...
