

## Redmine - Feature #22601

### Add ability not to emit "update emails" when doing mass-update of tickets

2016-04-21 09:04 - Maxim Krušina

<b>Status:</b>	New	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Email notifications	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b>			
<p>Sometimes I need to do some large ticket-maintenance tasks, like moving bunch of tickets from one project to another, or so. It works great, but it has some disadvantage - every time I do this, all my colleagues are flooded by large wave of emails (ticket updates), because they are watchers.</p> <p>It would be nice to send just one email, but I guess this will be not so simply, because there are different watchers in different tickets, so it can't be solved by just one email.</p> <p>But one feature can help - to have ability to "[x] Disable e-mail notifications for this mass update" - so just one checkbox in form for editing multiple tickets at once, which will disable email emitting for current mass-edit.</p>

i work around this as admin by turning off notifications for a second lol  
or doing things through the db.
