

Redmine - Feature #22676

Static issue list URLs

2016-04-29 14:16 - Robert Pollak

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Resolution:	Duplicate		
Description			
Often I would like to talk in an email about a group of e.g. five issues. In order to provide fast access to the issues, I need to copy all the issues' URLs into the mail. It would be very nice to have URLs like https://www.redmine.org/issues?query_id=270,359,267,293,118 that would open a corresponding issue list page. (Bugzilla does this: https://bugzilla.mozilla.org/buglist.cgi?query_format=advanced&bug_id=270.359.267.293.118)

- Related to Feature #4806: Filter the issue list by issue ids added

#2 - 2016-05-06 21:06 - Jean-Philippe Lang

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Resolution set to Duplicate

Done, see [#4806](#).

You can use the context menu on the issue list to link to a query that filters the selected issues, or generate a link manually, eg: /issues?issue_id=17302,17322&set_filter=1&status_id=*

Great, thank you!

#4 - 2017-06-30 12:25 - Robert Pollak

It seems that the list also works in simplified form, without `set_filter` and `status_id`: /issues?issue_id=17302,17322
Why doesn't the context menu create this instead?
