

Redmine - Feature #22895

Entering issue comments at the same time shouldn't be synced

**Description**

Hello in the current Redmine 3.2.2 are issue comments synced.  
If one user adds a comment and another user adds a comment in the meantime a issue conflict arise and the comment has to entered again.

The comments are in a different table of the database an adding one record set after another should be no problem nothing is overwritten.

After saving the issue the issue comment history should show the complete history.

History

- #1 - 2024-09-16 07:33 - Go MAEDA
- Status changed from New to Closed
  - Resolution set to Invalid

You don't have to enter your comment again.  
You can choose "Add my notes and discard my other changes" to save your comment when a conflict occurs. It was implemented in Redmine 1.4.0 ([#8691](#)).
