# Redmine - Defect #23019

## Markdown doesn't recognize mails

2016-06-08 18:19 - kay rus

| **Resolution:** | Wont fix | | **Affected version:** | |

**Description**

Redmine hides this email in markdown:

```
<a_bc@def.com>
```

But it doesn't hide this:

```
<abc@def.com>
```

**History**

**#1 - 2016-06-08 18:30 - Toshi MARUYAMA**

*- Category set to Text formatting*

**#2 - 2016-06-30 13:10 - kay rus**

https://github.com/vmg/redcarpet/issues/402

**#3 - 2017-06-04 05:38 - Go MAEDA**

The latest version of Redcarpet still have this problem (we upgraded Redcarpet to 3.4.0 in r16583).

**#4 - 2018-02-09 19:15 - Marius BĂLTEANU**

*- File markdown_emails.png added*

*- Status changed from New to Confirmed*

Redmine is not affected by the respective issue because we have no_intra_emphasis: true and the emails with _ are recognised correctly. Please see the below screenshot.

The issue with <a_bc@def.com> looks to be from the same Redcarpet gem, the text is filtered out because it is recognised wrongly as HTML tag.

markdown_emails.png
Rails console:

With :filter_html => true:

```
irb(main):012:0> Redcarpet::Markdown.new(Redmine::WikiFormatting::Markdown::HTML.new(:filter_html => true, :ha
rd_wrap => true), autolink: true, no_intra_emphasis: true).render("<a_bc@def.com>")
=> ""
```

With :filter_html => false:

```
irb(main):013:0> Redcarpet::Markdown.new(Redmine::WikiFormatting::Markdown::HTML.new(:filter_html => false, :h
ard_wrap => true), autolink: true, no_intra_emphasis: true).render("<a_bc@def.com>")
=> "<p><a_bc@def.com></p>\n"
```

**#5 - 2024-02-05 09:36 - Go MAEDA**

*- Status changed from Confirmed to Closed*

*- Resolution set to Wont fix*

Using CommonMark Markdown instead of Redcarpet-based Markdown can avoid the issue.

Please switch to CommonMark Markdown. Redcarpet-based Markdown was marked as "deprecated" ([#36807](#)) in Redmine 5.1.0 and will be removed in the future version.
