Redmine - Defect #23031

CSS Wrong icon for details

2016-06-09 23:12 - César DJ Caësar 9114

Status:	Closed		**Start date:**

Category:	UI		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Wont fix		**Affected version:**	3.1.3

Description

Hello,
I'm currently developing a plugin for Redmine, and I saw that there may be a mistake regarding a class:

```
.icon-details  { background-image: url(../images/zoom-in.png); }
```

I would have written:

```
.icon-details  { background-image: url(../images/magnifier.png); }
```

Because "zoom-in" already exists here:

```
.icon-zoom-in { background-image: url(../images/zoom_in.png); }
```

And "magnifier" doesn't exist anywhere.

You should use .icon-magnifier which uses magnifier.png. .icon-details class is no longer used and should be removed.

Merci Jean-Philippe, but I'm currently using version 3.2.1 (stable) of Redmine, and there is no .icon-magnifier. There is a -search-margnifier in responsive.css, though.

I may have missed something but I looked among all the files using:

```
grep -rnw '/usr/share/redmine/' -e "magnifier"
```

- Related to Patch #24578: Remove unused CSS class ".icon-details" added

#4 - 2016-12-11 08:33 - Go MAEDA

- Category changed from Themes to UI

- Status changed from New to Closed

- Resolution set to Wont fix

Since I have created a issue [#24578](#24578) to remove icon-details, I am closing this issue.

responsive.css, though.

.icon-magnifier was introduced in Redmine 3.3.0.
