Redmine - Feature #23106

Add taskpaper 'language' to new code highlighting toolbar button.

Description

The new code highlighting toolbar button (#14937 / r15316) is providing support for all the CodeRay-supported languages except the 'taskpaper' language. While the CodeRay support for it can be questioned, I think it's best to keep the languages provided by the button in sync with the languages supported natively by CodeRay (as is the Redmine core documentation after r14489).
This issue is limited to simply adding the language name 'taskpaper' to the codeRayLanguages array in source:trunk/public/javascripts/jstoolbar/jstoolbar.js (I'm ignoring the minification steps here).

Thanks in advance.
