

Redmine - Feature #23310

Improved "jump to project" drop-down

2016-07-12 23:54 - Jean-Philippe Lang

Target version: 3.4.0	
Resolution: Fixed	

Description

I'd like to replace the "jump to project..." select with a more elaborate drop-down under the "Projects" link in the header. Here are some mockups for the standard and the mobile views.

The drop-down would display user's projects by default and provide an ajax based search field for finding other projects.

I'm setting it for 3.4.0, please let me know what you think about this change.

- File *parent_task.png* added

IMHO, it looks very good and solves a big current UI/UX issue: the impossibility to search after the project name (now we use the search from the browser, but we need to navigate first to projects page). Also, it can be improved in the future to include something like: recent projects (e.g: the last 3 projects opened by user) or favorite projects.

A little bit off topic, do you have in plan to use the JS library [Select2](#) to implement this? I'm asking because in our environment we use that library to make some improvements in parent task autocomplete from the issue page (*parent_task.png*) and we can contribute with the changes if the library will be part of the Redmine core.

#2 - 2016-07-13 11:39 - JW Fuchs

+1

This sounds like a great improvement!

#3 - 2016-07-13 15:54 - budo kaiman

For mobile, where exactly does that dropdown come from? Is it from clicking on the "Redmine" project name? I definitely think the new menu is an improvement, the placing just seems a bit odd to me (on both views).

#4 - 2016-07-13 19:57 - Jake Kemme

- File *selectplugin.PNG* added

We currently use the [Improved Searchbox Plugin](#) and would prefer to not move the quicksearch to a dropdown menu in core redmine.

#5 - 2016-07-13 20:05 - Robert Korulczyk

+1 for that. This will solve another annoying issue - finally you will be able to easily open different project in new tab by using middle-click.

#6 - 2016-07-16 21:13 - Sebastian Paluch

Although, I like the functionality (Ajax), I'm not convinced that moving this drop down is good idea.

Users are used to current drop down, this is most important, mostly used navigation way. I can already hear all the questions from dozens of users...

There is no other drop down menus like that, so, proposed solution seems to be totally new approach, not aligned with current style/navigation/etc.

Please also take a look on #19370.

- File minimal-menu.png added

Here is an alternate proposal which matches other sites like gitlab, based on jquery-ui/ fontawesome with the typical dropdown chevron

site-menu.png	mobile-menu.png
---------------	-----------------

Or, stick with a minimal change approach to avoid user confusion:

#10 - 2016-09-16 11:36 - Jan from Planio www.plan.io

We had implemented this functionality for a client as a plugin based on the popular [Select2 for jQuery](#).

We could transform this into a core patch and propose it here, if that is desired. But it probably would not make sense if there's existing code for this yet.

Jean-Philippe, are your screenshots made with Photoshop or do you have working code yet? Would you like us to propose an implementation based on Select2?

#11 - 2016-10-08 12:25 - Jean-Philippe Lang

I have some working code for this but it does not rely on Select2. Select2 has a huge footprint and I'd prefer not to use it.

#12 - 2016-10-11 17:24 - Jan from Planio www.plan.io

Okay, thanks for your feedback. Then, we'll happily wait for your implementation!

#13 - 2016-10-11 23:22 - Robert Schneider

May I suggest to think about a better project page (proposals are in many tickets, e.g. #3224) instead of implementing this project select? Since I don't see the big advantage of it. Although it's not bad to have it I would prefer to have better search and order options on the project page, together with some project information. There it could be also implemented with a "live" filtering (somehow).

One reason, why I don't like it that much, is that I need to open the dropdown with the mouse and then switch to the keyboard. And after that I will probably use the mouse again. A single click on the Projects link and some scrolling could be in many situations faster.

Just my 2 cents. Maybe I don't see the advantage yet.

I don't think you'd **need** to switch to the keyboard with the drop-down. Once you open the drop-down, you should be able to just scroll through the list (ie. exactly what you are proposing for the projects page, just without the extra page load).

#15 - 2016-12-16 09:07 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Fixed

The new "jump to project" drop-down that allow to search in all projects is committed.

#16 - 2016-12-19 18:36 - Kush Suryavanshi

For us, because we have more than 500 projects, this is really useful. Though, we would love to see #3224 with filter, order by, sort and export capacity just like issues - as it will help us in reporting on projects. Thanks much for this enhancement in drop down.

#19 - 2017-01-11 01:17 - Go MAEDA

- Related to Feature #14006: A shortcut to view all issues of all projects added

#20 - 2017-01-11 07:46 - Go MAEDA

- File all-projects-link.png added

I really liked the "All projects" link implemented in r16172. The operability of seeing cross-project information is greatly improved. Thanks, Jean-Phillipe.

all-projects-link.png

It covers feature request #14006 and #5860. I closed them.

#21 - 2017-01-15 03:35 - Go MAEDA

#24 - 2017-04-05 18:12 - Marius BALTEANU

- File autocomplete-on.png added

- File autocomplete-off.png added

- File autocomplete-off.diff added

I'm proposing to set the autocomplete off for the search input in order to avoid the cases where the autocomplete suggestions (from the browser history) overlaps the results returned in the dropdown. For example, I've the following issue on my chrome browser:

autocomplete-on.png

Setting the autocomplete attribute to off (patch attached):

autocomplete-off.png

I didn't open a new issue because the change is very small. If it is necessary, please let me know.

#25 - 2017-04-05 18:15 - Toshi MARUYAMA

- Status changed from Closed to Reopened

#26 - 2017-04-05 18:20 - Marius BALTEANU

- File autocomplete-off.diff added

Sorry, I've a mistake in my patch. Attaching the correct one.

#27 - 2017-04-06 19:13 - Jean-Philippe Lang

- Status changed from Reopened to Closed

Patch committed, thanks.

#28 - 2017-06-21 15:03 - Takeshi Nakamura

On new project creation screen, "Jump to project..." is not shown in the drop-down.

When accessing /projects/new, @project.try(:name) returns not nil but empty.

source:/trunk/app/helpers/application_helper.rb@16680#L380

Thank you for catching it. Here is a patch to fix the problem.

   trigger = content_tag('span', text, :class => 'drdn-trigger')
```

#30 - 2017-06-21 16:53 - Holger Just

Another option could be to use [Object#presence](#) as follows:

```
text = @project.try(:name).presence || I(:label_jump_to_a_project)
```

#31 - 2017-06-25 10:55 - Jean-Philippe Lang

- Status changed from Reopened to Closed

Fixed in r16688. #project_was is used to fix the text when editing a project as well (eg. edit a project, clear the ites name and submit).

Please open new tickets for defects on this feature from now on.
