

Redmine - Defect #23357

Lose hostname/path in news email notification including wiki

2016-07-18 12:53 - Sebastian Paluch

Status:	Confirmed	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	3.3.6
Resolution:			
Description			
<p>It seems that Redmine version 3.3.0 has broken links generation in email notifications for news (at least), with 3.2.0 noone was reporting such problem.</p> <p>I have a news publish that includes following description:</p> <pre>New software version#1267 has been released. It is ... {{include(myproject:100-0_Alpha_2_(rev_93029))}} h3. Feel free to report new issues * "myproject":/redmine/projects/myproject/issues/new</pre> <p>In email notification</p> <ul style="list-style-type: none">• the first link to version#1267 has been generated correctly,• the last one is missing server name that should be added automatically: http://redmine/projects/myproject/issues/new but should be http://host/redmine/projects/myproject/issues/new <p>Included wiki (myproject:100-0_Alpha_2_(rev_93029)) is in different project then the news and includes:</p> <pre>h3. Requirements * Service Pack version#1272 or newer {{include(myproject:Update_Instruction)}} ...</pre> <p>In email notification</p> <ul style="list-style-type: none">• the link to version#1272 has been generated wrong, it is missing server name: http://redmine/versions/1272 but should be http://host/redmine/versions/1272 <p>Included wiki (myproject:Update_Instruction) is in different project then the news and includes:</p> <pre>h3. Download All pre-production software releases are available on the "shared network location":file://host\fu ll\path\to\directory. ...</pre> <p>In email notification</p> <ul style="list-style-type: none">• the link to "shared network location" has been generated wrong, all "\" has been replaced with a code %5: file://\host%5full%5path%5to%5directory the link does not work and for some reason, it is not even possible to copy it from Outlook into clipboard <p>Environment:</p> <pre>Redmine version 3.3.0.stable</pre>			

```
Ruby version      2.1.8-p440 (2015-12-16) [i386-mingw32]
Rails version    4.2.6
Environment      production
Database adapter  Mysql2
SCM:
Subversion       1.8.11
Git              2.7.4
Filesystem
Redmine plugins:
computed_custom_field  0.0.2
inside_avatar          1.0.2
issue_filters          1.0.1
redmine_agile         1.4.1-3
redmine_checklists    3.1.1-1
redmine_custom_columns 1.1.0
redmine_favorite_projects 2.0.2-2
redmine_version_fixed_issues 1.0.1
sidebar_hide          0.0.7
```

If I change the "Host name and path" (in application settings / General tab) to the host name only e.g. host, then all links are wrong. Correct setting is host/redmine.

Also, please note, that some links are OK, and some are NOT OK.

#3 - 2016-12-14 18:57 - Sebastian Paluch

Any chance to take a look on this?

#4 - 2017-12-19 21:25 - Sebastian Paluch

Can I provide more information to speed this up?

Also, please note, that some links are OK, and some are NOT OK.

What is OK and NOT OK?
