The process of migrating to 5.2.1 does not simply add Rails 5.2.1 to the Gemfile.

It also involves changing the "ActiveRecord :: Migration [4.2]" in the migrate file.

Because id(11) will quickly overflow when using Redmine on a large scale application.

Let's evaluate the ability to switch to bigint(20), which is supported by default by Rails 5.2.1

Extending the width of the columns is a new feature request. Please open a new issue instead of adding notes to a closed issue.
