Tab buttons appear on pages that have no tabs

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Jean-Philippe Lang	**% Done:**	0%
Category:	UI	**Estimated time:**	0.00 hour
Target version:	3.3.1		
Resolution:	Fixed	**Affected version:**	3.3.0

Description

The JS condition that's supposed to hide the tab buttons checks if the first LI element is visible or not.
If there is no LI element, the tab buttons are always shown.

file: public/javascripts/application.js
line: 383

replace:

```
if ((tabsWidth < el.width() - bw) && (lis.first().is(':visible'))) {
```

by:

```
if ((tabsWidth < el.width() - bw) && (lis.length === 0 || lis.first().is(':visible'))) {
```

In case it helps, here is my environemt:

```
Environment:
  Redmine version                 3.3.0.stable

You don't need SVN to generate a patch. Check How_to_create_patch_series_on_Mercurial_and_Git or use the command **git diff > path_to_patch**
