Target version:	3.2.4			

Description

With r14819 we disabled zoom on mobile devices. This has stopped working for iOS devices running iOS 10 as maximum-scale=1 is being ignored (see also here:
https://medium.com/@johan_ronsse/re-apple-disabling-maximum-scale-behavior-on-responsive-websites-in-ios10-17bc7b0f27c0#.rkul46vzf)

Adding user-scalable=no to the viewport meta tag achieves our wanted behaviour also on iOS 10 and therefore fixes this issue. Attached you will find the according patch.
