

Redmine - Patch #23888

Show an error message when changing an issue's project fails due to errors in child issues

2016-09-22 08:18 - Jens Krämer

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	3.4.0		
Description			
The problem occurs for example when child issues have trackers that aren't present in the destination project. This very simple solution just displays a generic error message if the save is aborted due to a failing child save.

- Subject changed from show an error message when changing an issue's project fails due to errors in child issues to Show an error message when changing an issue's project fails due to errors in child issues

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

Message changed to a bit more specific one that includes the ID and the cause of the failure, eg: "Subtask #NNN could not be moved to the new project: Tracker is not included in the list".

It includes details about the first child that fails but I think it's more usefull to know what to look for exactly.

Please check that the german message is OK.
