

Redmine - Defect #23966

db:migrate InsertBuiltinGroups needs to be after RemoveUsersMail

2016-10-01 15:23 - Equipe Evolix

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Database	Estimated time:	0.00 hour
Target version:		Affected version:	3.2.0
Resolution:	Invalid		
Description			
Hello,			
db:migrate fails with old Redmine versions :			
InsertBuiltinGroups (20140920094058_insert_builtin_groups.rb) fails with old versions because users.mail column always exists :			
Mysql2::Error: Field 'mail' doesn't have a default value: INSERT INTO `users` (`type`, `lastname`, `created_on`, `updated_on`, `firstname`) VALUES ('GroupAnonymous', 'Anonymous users', '2016-10-01 14:28:55', '2016-10-01 14:28:55', '')/home/foo/.gem/ruby/2.1.0/gems/activerecord-4.2.5.1/lib/active_record/connection_adapters/abstract_mysql_adapter.rb:305:in `query'			
users.mail column is deleted after by RemoveUsersMail (20150113213922_remove_users_mail.rb)			
If I change order with InsertBuiltinGroups just after RemoveUsersMail, all is right.			
Regards,			
Grégory Colpart / Evolix
