Redmine - Defect #24271

htmlentities warning

2016-11-04 22:37 - James H

Status:	Closed		**Start date:**	
Priority:	Low		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Gems support		**Estimated time:**	0.00 hour
Target version:	3.2.6			
Resolution:	Fixed		**Affected version:**	3.3.1

Description
During my migration to 3.3.1, I got this warning:

.../ruby/gems/2.3.0/gems/htmlentities-4.3.1/lib/htmlentities/mappings/expanded.rb:465: warning: key "inodot" is duplicated and overwritten on line 466

Installing htmlentities 4.3.4 seems to resolve this message. Have not had any issues with htmlentities yet.

It cause by this.
https://github.com/naitoh/rbpdf/issues/33

#2 - 2017-01-25 01:13 - Go MAEDA

- Has duplicate Defect #24917: duplicated key upgrading from 3.3.1 to 3.3.2 version added

#3 - 2017-03-30 01:15 - Jun NAITOH

This problem fixed by rbpdf 1.19.1.
please bundle update.

#4 - 2017-03-30 02:23 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

Jun NAITOH wrote:

> This problem fixed by rbpdf 1.19.1.
> please bundle update.

I confirmed that this issue can be fixed by executing bundle update.
Naitoh-san, thank you for maintaining rbpdf.

#5 - 2017-04-05 13:07 - Toshi MARUYAMA

- Target version set to 3.2.6

#6 - 2017-04-06 18:48 - Jean-Philippe Lang

- Status changed from Closed to Reopened

An error occurs when running bundle update with rbpdf 1.19.1 under windows:

```
Using rbpdf-font 1.19.1

Encoding::UndefinedConversionError: "\x81" to UTF-8 in conversion from Windows-1
252 to UTF-8
An error occurred while installing rbpdf (1.19.1), and Bundler cannot continue.
Make sure that `gem install rbpdf -v '1.19.1'` succeeds before bundling.
```

#7 - 2017-04-06 18:48 - Jean-Philippe Lang

3.2.6 release is planned for this week-end, I'll have to revert to previous rbpdf version unless a fixed version of rbpdf is released. Thanks.

#8 - 2017-04-06 19:32 - Toshi MARUYAMA

What Ruby version do you use?
I cannot reproduce on ruby 2.2.6p396 (2016-11-15 revision 56800) [i386-mingw32] in Japanese Windows 10.

#9 - 2017-04-06 21:53 - Toshi MARUYAMA

- Status changed from Reopened to New

- Target version changed from 3.2.6 to 3.4.0

I can confirm rbpdf 1.19.1 cannot be installed on Ruby 1.9.3 and 2.0 on Windows.
I think there is no benefit to continue support Ruby 1.9.3 and 2.0.
So I create #25538.

#10 - 2017-04-06 21:54 - Toshi MARUYAMA

- Blocked by Feature #25538: Drop support for Ruby 2.2.1 and ealier, 2.2.2+ is now required added

#11 - 2017-04-06 21:55 - Toshi MARUYAMA

- Resolution deleted (Fixed)

#12 - 2017-04-08 03:20 - Go MAEDA

- Target version changed from 3.4.0 to 3.2.6

Toshi's test shows that the problem reported by Jean-Phillipe (#24271#note-6) occurs only with older versions of Ruby.

I think that it would be better to pin rbpdf version for Ruby <=2.0 only. Many Redmine user in Japan are annoyed with the defect #22335 due to rbpdf 1.19.0.

I want to prevent old Ruby user will say "ChangeLog says htmlentities warning fixed, but my Redmine still warn on my Redmine why?".

How about updating Gemfile as I wrote in #24271#note-12 without closing this issue (without listing this issue in CHANGELOG)? We can list this issue after dropping support for older versions of Ruby. I think that it is beneficial for users to deliver deliver fixes as soon as possible.

As Holger Just wrote in #25538#note-7, I think dropping Ruby 2.0 support right now is somewhat problematic.

3.2.6 release is planned for this week-end, I'll have to revert to previous rbpdf version unless a fixed version of rbpdf is released. Thanks.

Please wait.

This problem fixed by rbpdf 1.19.2.
please bundle update.

#17 - 2017-04-08 09:36 - Jean-Philippe Lang

- Status changed from New to Resolved

- Target version changed from 3.4.0 to 3.2.6

- Resolution set to Fixed
