Target version:	3.4.7			
Resolution:	Fixed		**Affected version:**	

Description

Horizontall scroll bar is missed on settings page for repository.
Problem appears after #20632 (because overflow: hidden; on #wrapper)

We can wrap repositories table with .autoscroll ofcouse or even do it in common/_tabs.html.erb
But maybe it would be better to remove overflow: hidden; from #wrapper?
I dont know what is the best way to fix this and want to discuss because this problem may affect many other pages.
I think that turning off horizontal scroll completely is not a good idea.

Similar problems:
#22336
#21808#note-5

- Category changed from UI to UI - Responsive

- Target version set to Candidate for next minor release

#5 - 2018-07-13 10:25 - Tomomi Yuzuriha

- File displaying_the_scroll_bar_on_settings_page_for_repository.patch added

I felt it was difficult to judge whether deleting "overflow: hidden; on # wrapper" would be fine or not, Because the range of #wrapper is too big.
So, I propose a patch using the same way as #22336 (displaying the scroll bar using .autoscroll).

#6 - 2018-07-14 03:41 - Go MAEDA

- Subject changed from Horizontal scrollbar is missing to Horizontal scrollbar is missing on settings page for repository

- Target version changed from Candidate for next minor release to 3.4.7

The very similar fixes were already delivered by [#22336](#) and [#28523](#). Setting the target version to 3.4.7.

#7 - 2018-07-16 04:01 - Go MAEDA

- Status changed from New to Resolved

#8 - 2018-07-16 04:05 - Go MAEDA

- Subject changed from Horizontal scrollbar is missing on settings page for repository to Setting page for repository does not scroll horizontally on small screens

- Status changed from Resolved to Closed

- Assignee set to Go MAEDA

- Resolution set to Fixed

Committed. Thank you all for reporting and fixing this issue.
