Description

Is there any way to enhance referencing issue ID in commit message without comma and space ?
It is useful in Non-English language (no space between words).
for example, I set a keyword "□□□" for fixing issues and a keyword "□□□" for referencing issues
Then ther is two commit message like below:
□□□□□□□□#123□#124□
□□□□□□□□#123□

This two can not work and need to change to:
□□□□□□□□ #123 □ #124 □
□□□□□□□□ #123 □
