

Redmine - Defect #24517

Database Link from Versions to custom\_field

2016-12-01 16:32 - daniel gawenda

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Database	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
Hello,			
I am looking for the internal database connection between the custom_fields and the versions table.			
How ist this connection established?			
I created a join from versions to projects to custom_fields_projects to custom_field, but I can not find my custom fields dedicated to my version in the database.			

History
