| <b>Description</b>   |          |                          |           |
| Hello,   |          |                          |           |
| I am looking for the internal database connection between the custom_fields and the versions table.<br>How is this connection established?                         |          |                          |           |
| I created a join from versions to projects to custom_fields_projects to custom_field, but I can not find my custom fields dedicated to my version in the database. |          |                          |           |

### History

#### #1 - 2016-12-01 16:44 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Invalid
