

## Redmine - Feature #2460

### List files on version page

2009-01-07 17:32 - Carsten Schurig

<b>Status:</b> New	<b>Start date:</b> 2009-01-07

<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b> I would like to have a list of all the files added to a version on the overview page of a version (maybe on the roadmap page too). Thus it would be very easy to access uploaded files as currently on the files list <b>all</b> versions are listed.  Now there is only the list of issues shown there (/versions/show/id).	
<b>Related issues:</b> Has duplicate Redmine - Feature #9630: show list of version related files in ... <b>Closed</b> <b>2011-11-22</b>	

### History

+1 I like this idea. So I could point to the version page instead of the download page and a user could see what was fixed and also access the files there.

If files module is active you can assign files to versions.

It would be nice to have a list of these files in an own box ("related files") similar as "related issues" shown in the version view, e.g.

<http://www.redmine.org/projects/redmine/versions/39>

Moreover an absolute count of related files in the roadmap per version would show the user, that there are documents available for this version.
