<b>Resolution:</b>	Duplicate		
<b>Description</b>			
<p>Hi, I was upgrading redmine from 3.3.1 version to 3.3.2 version. I followed as always steps wrote here <a href="http://www.redmine.org/projects/redmine/wiki/RedmineUpgrade">http://www.redmine.org/projects/redmine/wiki/RedmineUpgrade</a> but I noticed that the during the installation of gems it required for ruby &gt;=2.1 (I had 2.0.0).</p> <p>So I updated ruby with rvm and I was able to go ahead. But when I recreate the secret token I've an error.</p> <pre>bundle exec rake generate_secret_token</pre> <pre>/usr/local/rvm/gems/ruby-2.2.0/gems/htmlentities-4.3.1/lib/htmlentities/mappings/expanded.rb:465: warning: duplicated key at line 466 ignored: "inodot"</pre> <p>The same things happen trying to update the database:</p> <pre>bundle exec rake db:migrate RAILS_ENV=production</pre> <pre>/usr/local/rvm/gems/ruby-2.2.0/gems/htmlentities-4.3.1/lib/htmlentities/mappings/expanded.rb:465: warning: duplicated key at line 466 ignored: "inodot"</pre> <pre>(eval):53: warning: duplicated key at line 53 ignored: :format</pre> <p>I should move on or are errors that should be fixed?</p> <p>Thanks</p>
