| Description | |
| <p>When editing which projects a user is belonging to, it would be good to be able to have the list sorted by Project or Roles. Now it's hard to compare an existing user's permissions with a new user because the lists for some reason are not sorted alphabetically..</p> <p>The page in question is: https://foo.bar.tld/users/1/edit?tab=memberships</p> | |
