

Redmine - Defect #2512

Subproject filter do not work

2009-01-15 11:05 - Dmitry Maslennikov

Status:	Closed	Start date:	2009-01-15
Priority:	Normal	Due date:	
Assignee:	Mischa The Evil	% Done:	0%
Category:	Documentation	Estimated time:	2.00 hours
Target version:		Affected version:	
Resolution:	Wont fix		
Description			
I try filter issues of my project by subproject. But this does not work for me. Redmine ignores this filter and shows all issues for both project and subproject.

+1

Jean-Philippe what was the point of your note? Do you mean that we should avoid duplicates (I cant find one) or that you need version numbers? I have Redmine 0.7.devel.1249 (MySQL)

Attached is my issue list filtered for a specific subproject but it still includes the parent issues:

Screenshot_4.jpg

#3 - 2009-01-29 09:41 - Jean-Philippe Lang

- Status changed from *New* to *Closed*

- Resolution set to *Wont fix*

Jean-Philippe what was the point of your note?

There are some guidelines for submitting a bug. I'd appreciate that users take a few more seconds to provide the requested information. That's it. Sometimes, I just waste half an hour trying to reproduce a problem without success just because of some missing information.

Anyway, this is not a bug but a design choice.

Say you have project A with 3 subprojects B, C and D.

Subproject filter = 'none' => lists issues of A only

Subproject filter = B => lists issues of A and B

If you want to see issues of B only, go to project B issue list.

#4 - 2009-11-24 01:35 - Mischa The Evil

- Category set to *Documentation*

- Assignee set to *Mischa The Evil*

Documentation of this design needs to be added to the wiki. Assigned to remember it...

edit: also added the "precedes" relation to issue [#3952](#)

#5 - 2016-12-24 06:47 - Go MAEDA

- Has duplicate Defect #8853: Filter on subproject does not work added
