

Redmine - Defect #25138

Redmine::I18nTest Fails

2017-02-21 11:53 - Stefan Rinkes

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	3.3.2
Resolution:			
Description			
<p>I'm running in this reproducible test fail with Version redmine-3.3.2.tar.gz (md5: 8e403981dc3a19a42ee978f055be62ca) This test doesn't fail with redmine-3.3.0</p> <pre>1) Error: Redmine::I18nTest#test_languages_options_should_ignore_locales_without_general_lang_name_key: I18n::InvalidLocale: "foo" is not a valid locale lib/redmine/i18n.rb:58:in `ll' lib/redmine/i18n.rb:110:in `block in languages_options' lib/redmine/i18n.rb:110:in `map' lib/redmine/i18n.rb:110:in `languages_options' test/unit/lib/redmine/i18n_test.rb:203:in `test_languages_options_should_ignore_locales_without_general_lang_name_key'</pre> <p>I suspect it has something to do with the rails update from 3.3.0 (rails 4.2.6) and 3.3.2 (rails 4.2.7.1)</p>
