

Redmine - Defect #25146

Issue while modifying subproject configuration without the permission to create a subproject

2017-02-21 19:47 - Philippe Lotterie

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Project settings	Estimated time:	0.00 hour
Target version:		Affected version:	3.0.4
Resolution:	Duplicate		
Description			
Hi,			
When submitting changes for a subproject while the user doesn't have the permission to create a subproject, he gets an error telling that the value of the subproject field is not correct.			
The permissions he has for the projects are Modify project and Manage members.			
Of course granting Create subproject permission shows the subproject field in the configuration page and fixes this issue.			
Thank you for this great software,			
Best regards,			
Philippe			
Environment:			
Redmine version	3.0.4.stable		
Ruby version	2.1.5-p273 (2014-11-13) [i386-linux-gnu]		
Rails version	4.2.3
