**Description**

Currently, filters on *Assigned to* are restricted to user names or *<< me >>*. It'd be nice to be able to filter on the assignee's role. Otherwise, there's no way to search for tickets in status *New* that are assigned to users with the role *Developer*.

This becomes important when workflow has been restricted such that developers can only resolve tickets that are in the *Assigned* state.

**History**

**#1 - 2009-02-05 10:59 - Thomas Pihl**

Why don't you filter on the workflow-step(s) in that case?

We're using the assigned to less and less while using workflow in combo with tracker and category to keep track on what issue need what action (and how old is it).

/T
