

Redmine - Defect #25793

Cannot update a journal from REST api

2017-05-09 06:48 - Mao H

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
<p>Description</p> <p>I can get the journal from the REST api. But I cannot update it.</p> <p>Here I'll demonstrate it (specifically I'm updating notes).</p> <pre>curl -v http://server/pm/journals/327.json -H "Content-Type: application/json" -H "X-Redmine-API-Key: <my key>" -X PUT --data-binary "@put.note.json"</pre> <p>I don't get any response from the server and the server log shows it's not authorized:</p> <pre>Started PUT "/pm/journals/327.json" for 192.168.1.6 at 2017-05-08 21:46:21 -0700 Processing by JournalsController#update as JSON Parameters: {"notes"=>"update note", "id"=>"327"} Current user: anonymous Filter chain halted as :check_if_login_required rendered or redirected Completed 401 Unauthorized in 6ms (ActiveRecord: 1.8ms)</pre> <p>Given that I can update that from the website, and also given that I can use the same api key to get the issues and other information in the REST api, it seems like that JournalsController#update doesn't check the authorization correctly for TEST api.</p>			

History

#1 - 2017-05-09 06:58 - Toshi MARUYAMA

- Status changed from New to Closed
- Resolution set to Invalid

Please use forum for question.

#2 - 2017-05-11 07:26 - Mao H

- Status changed from Closed to Reopened

I believe it's a bug in the product. I pasted the log from the server. It doesn't check authorization correctly.

#3 - 2017-05-11 08:07 - Toshi MARUYAMA

- Status changed from Reopened to Closed

Because JournalsController#update does not provide API.

#4 - 2017-05-12 15:43 - Mao H

- Status changed from Closed to Reopened

Since it doesn't provide the api, can I ask for this feature?

#5 - 2017-05-12 17:13 - Toshi MARUYAMA

- Status changed from Reopened to Closed

Please use forum for question.

#6 - 2017-05-13 16:53 - Mao H

- Status changed from Closed to Reopened

I must miss something. Please tell me how the forum help?

Toshi MARUYAMA wrote:

Because JournalsController#update does not provide API.

It looks like the way to solve it is to have JournalsController#update to provide this API. This is a new feature I'm asking for or a bug we need to fix.

Thanks,

#7 - 2017-05-13 17:22 - Toshi MARUYAMA

It looks like the way to solve it is to have JournalsController#update to provide this API. This is a new feature I'm asking for or a bug we need to fix.

Why do you need journal REST api?

You can use issue REST api to edit journal.

#8 - 2017-05-14 16:37 - Mao H

Sorry. I didn't mean to be a question in the title. I thought I was summarizing the issue.

I'll use the forum then. I don't find how to use issue REST api to edit a journal from Developer's Guide. I only find how to get the journals with an issue.

Thanks,
