Redmine - Patch #2582

Linking to Lotus Notes documents

2009-01-26 07:43 - Arndt Lehmann

Status:	Closed		**Start date:**	2009-01-26
Priority:	Normal		**Due date:**

Target version:	0.8.1			

Description

Hi, in our company we commonly link from Redmine issues to documents on our Lotus Notes servers.
These links look like this:

```
"Notes":Notes:///4125749A0018C13D/42FC5416F4D71EB04925749E0021CF19/A5352E3CC7379C3B49159538003D1A6
B
```

or this:

```
"Notes":Notes://homeserver/4125749A0018C13D/42FC5416F4D71EB04925749E0021CF19/A5352E3CC7379C3B49159
538003D1A6B
```

That worked very well till revision [r2212](). Afterward, due to the stricter checking, the text was shown as entered, not rendered as hyperlink anymore.

Attached patch re-enables support for rendering of Lotus Notes links.
I would appreciate if you could apply the patch (or let me know your concerns if not).

Thanks for this great software!

Environment:

- mysql Ver 14.12 Distrib 5.0.51a, for redhat-linux-gnu (i386)
- ruby 1.8.6 (2008-03-03 patchlevel 114) [i386-linux]
- rails 2.1.2
- redmine revision 2316

Associated revisions

Revision 2344 - 2009-01-31 15:50 - Jean-Philippe Lang

Less strict textile links parsing (#2582).

History

#1 - 2009-01-31 15:46 - Jean-Philippe Lang

- Status changed from New to Resolved

- Target version set to 0.8.1

Fixed in [r2344](). Any [a-zA-Z]+:// is now allowed.

#2 - 2009-02-09 19:47 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged in 0.8 branch in [r2425]().
