Description

In the last versions, Redmine evolved a lot, with a plenty of new features, mainly (IMHO) becoming responsive.

Nowadays the most users use mobile to explore sites.

When new mobile users arrive, they should realize how powerful this wonderful piece of software is and have a good mobile experience.

FTR: Why don't you use latest version on redmine.org?

+1

Is it that hard to update it? I guess there are some special tweaks (e.g. plugin listing?), but it should be done nevertheless.
