Target version:	3.4.3		

Description

A small patch that could really enhance "jump to project" autocomplete experience: if a project is selected, then focus it when the project list expands and start from here when navigating with keyboard arrows.

Use case: when you have projects and subprojects, it's really painful when you want to quickly access parent or sibling project. It's nice to have the current project focused.

I didn't go as far as positioning the widget's scroll bar so the selected project is on top

FYI: Your patch has only some whitespace changes.

#3 - 2017-07-10 11:02 - Gabriel Cardoso

- File *focus-selected-project-drdrn-fixed.patch* added

Updated version of the patch : autocompleted text input was not focused on expand

#4 - 2017-07-16 20:43 - Jean-Philippe Lang

Only works for me when in "mobile" display. Otherwise it's always the search field that gets the focus (because of `drdrn.find(".autocomplete").focus();` when not in mobile display).

Anyone else has tested this patch?

#5 - 2017-07-16 20:50 - Jean-Philippe Lang

OK got it. Looks good to me.

#6 - 2017-07-16 20:50 - Jean-Philippe Lang

- *Target version set to 3.4.3*

#7 - 2017-07-22 08:42 - Jean-Philippe Lang

- *Status changed from New to Closed*

- *Assignee set to Jean-Philippe Lang*

Committed, thanks.
