

Redmine - Defect #26468

Using custom fields of type "File" leads to unsolvable error if filetype is not allowed

2017-07-18 13:44 - Mischa Mundwiler

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:	3.4.3	Affected version:	3.4.1
Resolution:	Fixed		
Description			
<p>I have setup the following custom field using the "File" format with the restriction of allowed filetypes: doc, docx, pdf</p> <p>If I create a new ticket with any of the three types everything is fine.</p> <p>But if I upload a file of differnte file type I get the following message:</p> <p>- CR-Dokument is invalid (Allowed extensions: doc, docx, pdf) -> this is OK</p> <p>BUT: I cannot change the document anymore nor can I remove it. Therefore I am stuck in the dialog and the only possiblity is to cancel everyhting (compare attached screenshot).</p> <p>Expected behavior: Upload another file or remove it should be possible.</p>

- Target version set to 3.4.3
- Resolution set to Fixed

Indeed, the icon to remove the file is not visible after submitting the form (even if it's not visible, you should be able to click on it just on the right of the field that holds the filename).

This should be fixed by r16835.
