+1

time_tag is really needed to know detailed updated time.

Hello.

I am trying to translate "label_x_revisions" in .yml and I have a question.

Why did you called this label "revisions" (like in "Repository" module) but not "versions" (like in wiki history) ?

Wiki history now uses "Revisions" only.

I think that showing the familiar "history" icon is better. If there is the icon, users can find the important link easily and can understand that the "X revisions" is the link that they used to call "History" link.

Without the icon, users may not be able to find this feature and misunderstand that "History" has been removed.

Redmine 3.4:

We had an icon beside the History link.

redmine-3_4@2x.png

The current trunk (Redmine 3.4.6.devel.17516):

"History" was changed to "X revisions" and the icon was removed.

The current trunk with the proposing patch:

Adding the icon is intuitive and consistent with older versions.

Would it be confusing/a problem to keep the "History" button above? I think the information below is a great addition, but the button on the top would allow easy access to the history (without the need to scroll down)- and all other "control" elements are there, too.

As an imho: In that case I'd drop the icon below, I think it looks more elegant. But I am not an UI/UX expert ;-)

#13 - 2018-11-09 16:54 - Vasili Korol

I am +1 for keeping the "History" link at the top, in addition to the new controls at the bottom.

#14 - 2018-11-14 10:44 - Jérôme BATAILLE

Hi, Sound good to me to keep it.

#15 - 2018-11-29 17:36 - Jean-Philippe Lang

- Status changed from Reopened to Closed

History link restored at the top of the page.
