

Redmine - Defect #2681

Issues: note edit form does not show up when clicking the "Edit" icon

2009-02-05 16:16 - Stéphane Rondinaud

Status:	Closed	Start date:	2009-02-05
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
Ruby version: 1.8.6 Rails version: 2.1.2 Redmine version: 0.8.0			
When trying to edit my own notes in an issue, the note text and the Edit icon become hidden but the edit form does not show up, leaving the note "body" empty.			
No error in log:			
Processing JournalsController#edit (for blah.blah.blah.blah at 2009-02-05 16:03:04) [GET] Session ID: 1917d3e874fd3483aa1ebd186733b6b0 Parameters: {"action"=>"edit", "id"=>"100", "controller"=>"journals"} Rendering journals/edit Completed in 0.03200 (31 reqs/sec) Rendering: 0.01600 (50%) DB: 0.01600 (50%) 200 OK [http://mumblemumblemumblemumble/redmine/journals/edit/100]

What's your browser please ?

I see on your screenshot that some images (eg. comment.png) could not be loaded, is there a reason for that?

#2 - 2009-02-16 14:12 - Stéphane Rondinaud

- File *Before_click.jpg* added

- File *After_click.jpg* added

Sorry Jean-Philippe, just saw your feedback.

Browser is Firefox 3.0.6

Redmine just updated to 0.8.1

Attached are whole page screenshots, as I admit my first screenshots could be misleading.

The mouse cursor is an hourglass because of the screenshotting software, no because the page is still being loaded.

#3 - 2009-02-16 14:40 - Mischa The Evil

Just my two cents on this issue;

I'm not able to reproduce this behaviour on:

- Apache 2.x with Phusion Passenger
- REE 1.8.6-X
- Rails 2.1.2
- MySQL 4.1.20
- Redmine trunk@r2167 (== 0.8)

using Mozilla Firefox 3.0.6 and other (recent-versions of) browsers like IE, Opera, Chrome and Safari...

I've tried poking with the permissions also but couldn't force Redmine to give a defect, like issued here, at all.

#4 - 2009-02-16 15:18 - Stéphane Rondinaud

Our Redmine database was upgraded from 0.7.3 -> 0.8.0, and today made the jump to 0.8.1.

The user with which I'm having the problem has both the "modify own notes" and "modify notes" permissions granted.

#5 - 2009-02-18 05:06 - Eric Davis

Stéphane Rondinaud, are there any errors shown in Firefox's error console (Tools > Error Console)?

#6 - 2009-02-19 08:59 - Stéphane Rondinaud

No error in Firefox's console.

The "update" div keeps it's "display: none;" styling, and the action of the form child (id="issue-form") is still pointing to the issue (action="/redmine/issues/edit/74").

#7 - 2009-04-09 12:02 - Stéphane Rondinaud

- Status changed from *New* to *Resolved*

This was an Apache configuration problem: the redmine public directory was aliased to prevent proxying of static resources... but was pointing to an old version of redmine.

Sorry for the trouble.

#8 - 2011-11-27 23:59 - Mischa The Evil

- Status changed from *Resolved* to *Closed*

- Resolution set to *Invalid*
