

Redmine - Defect #27107

Issue statuses not taken into account

2017-10-02 09:41 - LI AR

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	2.5.2
Resolution:	Invalid		
Description			
Hi, In Redmine 2.5.2.devel (debian 8 latest package), in Administration > Issue statuses, I set up a few different ways to close an issue (e.g. "Won't fix", "Completed"), these new "Issue statuses" cannot be selected either when I create a new issue or when I edit a previous issue.

- Status changed from New to Closed
- Resolution set to Invalid

Redmine 2.5.2 is not maintained.

#2 - 2017-10-20 11:28 - LI AR

- Status changed from Closed to Reopened

It's unfortunate that 2.5.2 is not maintained, as it is the only version available as a package in Debian, but that rather a Debian problem...

Whatever, I painfully manually installed Redmine 3.4.3.stable with rbenv (*) and I face the EXACT SAME problem:

<https://i.imgur.com/1iSIWW0.png> -> Issue Statuses are customized and numerous

<https://i.imgur.com/uxDZcZC.png> -> Statuses I can set my Issues to, are just the default ones...

(*) I installed all that as www-data to run redmine in Apache2. I found very strange that there's no official doc to do so as it appears the most straight-forward way to run a new web app when you already run several other ones...
