Redmine - Feature #27371

need seperate permission for changing status of issue only

2017-11-02 21:57 - Jon Schell

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Permissions and roles		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid			

Description

Right now there's a single permission allowing a role to fully edit an issue. But a common way for using issues is that the assignee would change the status of an issue when a commit happens, so they need this permission, but they shouldn't be able to also edit the priority or version or other properties of an issue. So there's needs to be a separate permission that allows editing the status of an issue, which then follows the workflow settings.

History

- File screenshot_permissions.png added

Is this the thing you're looking for?
You can set, if the field is read-only by role, tracker and status...

That's probably overkill for what I need, but it looks like it should be right. I'll check it out when I can get IT to upgrade our install. We're still on 3.0.3. What version did that appear in?

#3 - 2017-11-04 06:53 - Bernhard Rohloff

According to #8050-48 the Feature was implemented in 2.1.0.

#4 - 2017-11-06 20:00 - Jon Schell

- Status changed from New to Resolved

Son of a ...
I never saw that tab. :(
Thanks.

#5 - 2017-11-06 22:13 - Marius BĂLTEANU

- Status changed from Resolved to Closed

- Priority changed from High to Normal

- Resolution set to Invalid

Thanks for the feedback. I'm closing this issue as invalid.
