Resolution:		**Affected version:**	

Description

Hi Team,

I receive the following output when I attempt to select a different tracker as opposed to the default one that is chosen when the "New Issue" page loads:

```
Processing IssuesController#new (for 192.168.0.3 at 2009-02-16 18:40:39) [POST]

```

I believe this is an issue with the following [#2625](#) as I applied the patches and was attempting to have custom list boxes working.

I have two different custom fields setup which are list boxes and allow the user to select more than one item. I have three trackers.

2 of the trackers use custom field [#1](#), and the last tracker uses custom field [#2](#).

When I load the New Issue page everything works correctly and I am able to access both the trackers that have custom field [#1](#) set. If I attempt to select the third tracker, a 500 error occurs with the output above.

I have also looked at the following link: http://www.redmine.org/repositories/revision/1/1317

However I was not able to fix the issue with this.

Any help would be greatly appreciated as we are using this system in production and being unable to add items is painful!

Thank you very much in advance.
