<b>Description</b> <p>I didn't find any way to hide the list of changed files on each revision page (like <a href="http://www.redmine.org/repositories/revision/1/2475">http://www.redmine.org/repositories/revision/1/2475</a>). I would like my users to be able to see each revision (and its message), but not the file list (ie. the structure of my application).</p> <p>Is there any way to do it? Or could we implement an authorization for this? Like "See changed file list".</p> <p>Thanks a lot!</p>

Revision 2499 - 2009-02-21 13:58 - Jean-Philippe Lang

Do not show the changed files list on the revision page if the user is not allowed to browse the repository (#2762).

History

#1 - 2009-02-19 19:54 - Jean-Philippe Lang

Maybe we should hide the changed files list if the user is not allowed to browse the repository (this permission already exists). What do you think?

#2 - 2009-02-21 13:57 - Jean-Philippe Lang

- Category changed from UI to SCM
- Status changed from New to Resolved
- Resolution set to Fixed

The change proposed above is committed in [r2499](#).

#3 - 2011-03-29 12:41 - Toshi MARUYAMA

- Status changed from Resolved to Closed
