Javier Menéndez Rizo wrote:

Problems fixed:

- parent option not working
- migration option not working

Please explain more details.

AFAIK Redmine plugin is based old Rails engines, but current Redmine does not implement full feature of Rails engines.

#3 - 2017-11-28 14:53 - Javier Menéndez Rizo

Problems:

- parent option: before the patch the parent option do nothing because in the model.rb template is not defined

Before patch model.rb template only inherits from ActiveRecord::Base

```
class <%= @model_class %> < ActiveRecord::Base
```

After patch model.rb template uses the method parent_class_name to calculate the parent and put it on the template

```
class <%= @model_class %> < <%= parent_class_name.classify %>
```

- migration option: before the patch the generator always generates the migration file, even if you pass --no-migration

After patch redmine_plugin_model_generator.rb i put a guard clause for generate the migration or not

```
return unless options[:migration]
migration_filename = "%.14d_#{@migration_filename}.rb" % migration_number
template "migration.rb", "#{plugin_path}/db/migrate/#{migration_filename}"
```

#4 - 2017-11-28 14:58 - Javier Menéndez Rizo

New feature:

Timestamps in the name of the generated migration file, right now redmine plugins generates the migrations in this form:

```
001_create_polls.rb
```

After patch

```
20171127212003_create_polls.rb
```

#5 - 2017-12-27 18:28 - Toshi MARUYAMA

OK, I see.

On trunk [r17132](#):

```
$ rails generate redmine_plugin_model --help
```

Usage:

```
rails generate redmine_plugin_model NAME MODEL [field[:type][:index] field[:type][:index]] [options]
```

Options:

```
[--skip-namespace], [--no-skip-namespace] # Skip namespace (affects only isolated applications)
[--migration], [--no-migration]          # Indicates when to generate migration
[--timestamps], [--no-timestamps]        # Indicates when to generate timestamps
[--parent=PARENT]                         # The parent class for the generated model
[--indexes], [--no-indexes]               # Add indexes for references and belongs_to columns
                                           # Default: true
```

Runtime options:

```
-f, [--force]                # Overwrite files that already exist
-p, [--pretend], [--no-pretend] # Run but do not make any changes
-q, [--quiet], [--no-quiet]   # Suppress status output
-s, [--skip], [--no-skip]     # Skip files that already exist
```

Description:

```
Generates a plugin model.
```

Examples:

```
bundle exec rails generate redmine_plugin_model meetings pool
```

#6 - 2018-01-25 17:21 - Toshi MARUYAMA

- Target version set to 4.1.0

#7 - 2019-06-20 16:17 - Jean-Philippe Lang

- Category set to Plugin API

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

Committed, thanks.
