Description

I want the function to display only the tickets that arrived on the due date on the calendar (URL and button designation)

In large-scale project management,
A large amount of tickets today with start date / due date are displayed on the calendar.

Managers want to check the processing situation for today / near-term deadline tickets.

In this case, I do not want to display the start date. That is not important.

Do you mean a feature like this?

The screenshot shows the Redmine calendar interface. At the top, there is a 'Calendar' header. Below it, there are two sections: 'Filters' and 'Options'. The 'Filters' section has a 'Status' filter set to 'open'. The 'Options' section has a 'Display' sub-section with two checked options: 'Start date' and 'Due date'. Below the options, there are controls for 'Month' (September) and 'Year' (2018), along with 'Apply' and 'Clear' buttons. At the bottom, there is a calendar grid for the month of September. A yellow notification box is visible on the 30th of September, stating 'Bug #7: Issue due today'.

Thanks for your comment.

That's right.

It is good to be able to select the start date and the due date separately.
