**Description**

The current UI for deleting a project does not have an obvious "Cancel" action.

This page at first glance looks like it has 2 options: "Yes" and "Delete". The third option, "Cancel", is unclear because you must hit back button or navigate away.

I suggest adding a "Cancel" or "Back" button here, which brings you back to the Projects Administration page.

The page in question is: /projects/888hhh/destroy

*- Target version set to 2.4.0*

Maybe this could be implemented as a small feature for 2.4.

If no one else implements it till then, I will try to provide a patch when I leave the hospital.
