any update on this ?

#2 - 2018-03-22 17:40 - Bernhard Rohloff

any more information on this?

Nobody can figure out your exact problem based on a single line...

Please see the [submission guidelines](#), too.

#3 - 2018-03-23 07:34 - pradeep pal

let me explain you what we need

1 - In redmine we have one project which is made as private.

2 - We have setup a group which contains all users of redmine with role having to view own issues. ie they can see there own tickets only not all tickets which are created by other users.

3 - Now When we add a watcher in the ticket they dont receive any email notification as well they are not able to see the tickets also.

So we need your help to setup the project with private attribute and watchers and new authors should get email notification.

#4 - 2018-03-23 07:52 - Marius BĂLTEANU

- Status changed from New to Closed

- Priority changed from Urgent to Normal

- Resolution set to Duplicate

In Redmine core, the watcher must be a member of the private project in order to be notified or to get access to the issue. Please read more about this starting from the related ticket [#8488](#). Also, in that tickets you can find some patches that works great and add this feature to Redmine.

I'm closing this one as duplicated.

Redmine.

I'm closing this one as duplicated.

I am trying to install the 23546-watched_or_created_or_assigned_issue_visibility.patch but unable to do it.

I run the command `patch -p0 < filename.patch` but getting too many errors. Could you give me the steps you followed to install it?

Thanks.
