Description			
<p>Persian translation of Redmine has been updated to fix the usability issues with the very old translation still in use (see #7418-18) and also to add translations for newly introduced strings since the last update of Persian translation which has been a long time ago.</p> <p>It's notable that the provided translations are based on commercially proven ones used and improved in Peygir service over the years.</p> <p>This is an official contribution by developers of Peygir service, Bonyan Co., back to the great Redmine community.</p>
