

Redmine - Patch #28649

Log automatic rescheduling of following issues to journal

2018-04-27 07:43 - Kevin Fischer

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	3.3.8		
Description			
The bug described in #4154 seems to be already fixed.			
The attached patch fixes a related bug, because of which updates to the due date of a preceding issue were not reflected in the following issue's history.

- Related to Defect #4154: Automatic rescheduling by precedes issue-relation should be added to the journal added

#2 - 2018-04-28 04:27 - Go MAEDA

- Target version set to 3.3.8

I confirmed the problem and the patch looks good to me, setting target version to 3.3.8.

When you add a "Follows" relation to an issue and if the start date of the following issue is sooner than the due date of the preceding issue, start date and due date of the following issue will be automatically updated and those updates are logged to the journal. It is the expected behavior.

However, if the dates of the following issue are automatically updated by editing the due date of preceding issue, nothing is logged to the journal. This case should also be logged to the journal, as Kevin Fischer pointed out.

#3 - 2018-05-01 05:50 - Go MAEDA

- Subject changed from Add Due Date update of preceding issue to journal of following issue to Log automatic rescheduling of following issues to journal

#4 - 2018-05-08 01:51 - Mischa The Evil

- Related to Feature #27644: Journals and notifications on changes on Issues set by relations added

#5 - 2018-05-08 01:56 - Mischa The Evil

@Go: This actually seems to fix one of the three cases in which issue attributes can change without notification and/or journaling of these changes:

1. issue relations: [#27644](#), which, I think, would be fixed by the patch proposed in this issue (along with [r13534](#) as you have mentioned yourself in issue [#4154#note-9](#))
2. parent-child relations: the subject of [#6687](#) and [#5875](#)
3. default custom field values: a side-effect of the implementation of [#21074](#), reported in [#25726#note-4](#)

#6 - 2018-06-10 08:01 - Jean-Philippe Lang

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

Fix committed in [r17373](#). I've changed the patch a bit in order to create a journal on the following issue only if the main issue has a journal.
