Description

"Email notifications" section on "My account" page, you can select which project notifications to receive if you choose "For any event on the selected projects only..."

you cannot select/deselect all projects at once because there is no check/uncheck all icon which you can see various pages in Redmine.

I think also "Email notifications" section should have check/uncheck all icon when users select projects by using checkboxes.

Email notifications

For any event on the selected projects only...

- eCookbook
 - Private child of eCookbook
 - Child of private child
 - eCookbook Subproject 1
 - eCookbook Subproject 2
- OnlineStore

For unselected projects, you will only receive notifications about things you watch or you're involved in (eg. issues you're the author or assignee).

I don't want to be notified of changes that I make myself

I think that you can realize that feature by adding this one line.

This is a nice feature for those who need to see many projects.

Thank you for posting the patch so quickly.

Setting target version to 3.4.7.

Mizuki ISHIKAWA, maybe it would be better to use a green tick icon which is used on other pages. What do you think about this idea?

I suggested [#29053#note-1](#) because I did not have the idea of enclosing with a fieldset. The green tick icon is used frequently on other screens, so I think that the layout you suggested is better.

By applying the following code, [#29053#note-4](#) layout can be realized.

I slightly updated the patch in [#29053#note-6](#). The previous patch shows an empty "Projects" box when other than "For any event on the selected projects only..." is selected.
