Target version:				
Resolution:	Fixed		**Affected version:**	

Description

I am using revision 2552. When I export the issues without any filters it works fine. But when I export issues with filters applied (for example, I have multiple issue trackers, and when I restrict the listing to one tracker) it exports all issues from all the projects where I am member of. This has caused a bit of a problem now.

Associated revisions

Revision 2554 - 2009-03-06 23:46 - Jean-Philippe Lang

Fixed: export links on the issue list lose project param after applying a filter (#2908).

+1
Yes this is a complete disaster. Happens often with Exports and sometimes on the screen. I attach an example where I am focussed on one project but the listed issues are from all sorts of other projects.

#2 - 2009-03-06 12:01 - Geordee Naliyath

We did not see this issue in 0.7.x. Recently I upgraded to 0.8.x and one of the project managers reported this issue. Apparently he exports filtered issues a lot and now he is a bit irked about this bug.

#3 - 2009-03-06 23:46 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

Yet another side effect of the URL changes in trunk. It's fixed in r2554.

Ewan, if you have a problem on the issue list (not on the exports), please open a ticket and give the steps to reproduce.
